

SOMA

HYBRID FUZZ DEVICE

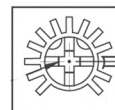

Soma is the Massif circuit with the tone stack and output stage of the EHX Tall Font Russian

More grind than the Massif and now also full tonal control. You can get ultra compressed to EW territory all the way to huge big nasty tones. Hand selected transistors and the same quality components in all of our pedals make this a beast to behold.

Heavy and Saturated

More Glitch

More Fuzz

Don't forget about the internal Bias trim!

Thick and Fuzzy
